

(Senior) Project Leader/Lead Analyst within Market Access or Real World Evidence

Do you have experience in market access, RWE, and project leading? Do you want to work in an exciting international environment at a growing HEOR consultancy? Are you a team player with an analytical mindset and a proven track record? We are looking for a talented (Sr) Project Leader or (Sr) Lead Analyst to join our team.

Company and position:

QUANTIFY Research, founded in 2011, is an experienced partner to the pharmaceutical industry and academic institutions. We provide high quality, professional consultancy services incorporating scientific expertise, strategic advice, and commercialization support where patients are always in focus. We have our roots in academia with broad competence in health economics, market access, and real-world evidence. QUANTIFY is a growing, innovative company.

As a (Sr) Project Leader/Lead Analyst you will be responsible for designing and leading advanced, large-scale projects within Nordic market access, economic modelling and/or RWE. You will design and execute multiple projects as well as identify sales opportunities and participate in proposal writing. You will ensure client satisfaction through careful planning, clear communication, high quality deliverables, and collaboration within teams.

Your qualifications:

- Postgraduate degree in economics, statistics, epidemiology, engineering, mathematical modelling or similar
- 3+ years' work experience at a pharmaceutical

company, consultancy, government agency or university

- Experience with HTA, MA, RWE and/or strategy
- Experience in statistical programming (VBA, python, R, Stata)
- Development of economic models (cost-effectiveness, budget impact) and HTA submission
- Up-to-date understanding of and experience with the Nordic HTA landscape
- Strong analytical skills combined with a solution oriented "hands-on" mentality
- Experience in writing statistical analysis plans, study protocols, medical dossiers, manuscripts, and abstracts
- Excellent project and time management skills including the ability to effectively prioritize across multiple projects
- Excellent written and verbal communication skills in English. Fluency in a Nordic language is a merit

What we offer:

A workplace where you can develop your skills in a fast-paced, high-impact environment. There are many opportunities for leadership and involvement in exciting initiatives. You will be involved in helping patients access needed medicines in a variety of disease areas. We offer a good work life balance, competitive compensation and a friendly, supportive workplace. We are humbled to consistently receive top ratings from our employees.
